WE NEED YOUR HELP:

We are looking for motivated young people to help us in our socio-educational programs aimed at children and adolescents in Navarra.

Young people interested in youth participation, social development, international cooperation, children's rights, social mobilization, etc.

We promote non-formal education proposals that seek to promote social ties and citizenship, which develop social participation and learning about life in common. Through activities like: outings, youth exchanges, artistic creation workshops, educational radio, employment initiation, street actions, horticulture, cooking, sports, social media, ...

We establish relationships of trust with young people and inspire the system for new initiatives. All these actions are part of our **socio-educational Innovation Laboratory**, which tests methodologies and approaches, which connects and brings practices from other places.
